TSL-KVW Vertically Adjustable Low-Profile Workstation

ICWUSA.com, Inc. has a variety of options for low-profile mounts.

This week's bulletin features a manually operated low-profile workstation called the TSL-KVW. This model allows you to manually adjust the keyboard and monitor to your desired height.

The keyboard and monitor are adjusted separately and will travel the full length of the Ultra wall track. The longer the track, the more travel you will have. Suggested *Ultra track lengths are 36" (91.44 cm) and 50" (127 cm).

The TSL-KVW will stow with the keyboard and standard depth monitor below 4", making it an ideal mount for meeting building safety codes.

This unit is ideal in high traffic areas such as hallways, x-ray stations and other workstations.

For added versatility, the VQC quick release monitor mount can be added.

For more information on ICW mounts, please email sales@icwusa.com or call 1-800-558-4435 to speak to one of our product specialists.

*Ultra track sold separately.
